

2021 Neighborhood Infrastructure Improvements Construction Update #2 – 5/21/2021

What has happened during the past week?

- The old asphalt surface of 15th St W between Pine St and Lyn Way has been removed
- Driveway removals have been sawcut and curb, sidewalk, and driveway removals have begun
- The temporary water system has been set up, sanitized and tested for cleanliness

What is scheduled for the week of May 24th?

- The contractor will begin switching residents between Pine St and Lyn Way to temporary water service as early as Tuesday
 - If possible, residents should check that the inside shutoff valve for their home's water service line is operational. The contractor will have to operate the inside shutoff to isolate their home's plumbing to begin temporary water service.
- Underground utility replacement will begin; water main replacement will begin as early as Wednesday

Access along 15th St W in the vicinity of excavations will be limited during working hours (generally 7am to 7pm, Monday through Saturday.) We ask that residents please move necessary vehicles out of the construction area before 7am on work days. Please be cautious when walking or driving near construction equipment or active excavation during working hours. Every evening after work is completed, crews will be backfilling excavated areas and smoothing out the street area to restore access.

Many years of paving over old asphalt layers left a thick asphalt cross section to remove

Milling the old asphalt surface off of 15th St W and hauling out the millings

Who do I contact with questions or for assistance? Project management services are being provided by the City's Engineering Department. The department can be reached at **(651) 480-2334** with project questions and concerns.

Spread the Word & Encourage E-Updates! Please make sure to share this information with your neighbors and tenants, and encourage them to sign up for at least one of the two electronic updates options if they have not yet done so!
